

“Dane and I worked together for several years at Rio Tinto. We worked on many projects where he was responsible for implementing IT solutions for the department I managed (Quality). His ability to work with us to identify long term needs, predict potential issues, and put the right resources in place ensured a positive outcome every time. It was a pleasure to work with Dane and I highly recommend him!” – Andrea Vaccari, Director, Health, Environment & Sustainable Development at International Copper Association

“Dane and I implemented and upgraded more new systems than I can recall. Dane is beyond experienced in talking both in finance terms and system terms. He was invaluable in understanding what was needed from an accounting perspective and communicated flawlessly to the systems folks to ultimately deliver a fit-for-purpose solution. He was outstanding at challenging my tendency to automate my existing processes and instead appropriately pushed to optimize the relationship between process and system. He did this by fully understanding the software functionality and bridging it with the business need and finding the combination of the two. He proved to be an excellent business partner between finance and technology.” – Catherine O’Brien, CFO

## **DANE REECE, SENIOR GLOBAL IT LEADER & BUSINESS PARTNER**

**Unique IT and Finance skills, strong partnership ability across functional areas, and varied industry experience combine to deliver for clients.**

[linkedin.dane@gmail.com](mailto:linkedin.dane@gmail.com) 303.882.5254 [www.linkedin.com/in/danereece](http://www.linkedin.com/in/danereece)

### **Why will your organization benefit from Dane Reece?**

- Business oriented senior IT leader with global, cross-functional, matrixed organizational experience in multiple industries helping companies improve operational efficiencies and cost savings through shrewd IT investments
- Strategic business professional that leverages operational measurements, cost controls, and financial plans to successfully deploy IT initiatives, including process improvement projects, global systems implementations, risk assessments, and change management communications resulting in business efficiency
- Strong communicator able to translate across a broad spectrum of teams and levels (CFOs, CIOs, business process owners, technical project teams) resulting in improved delivery timelines and solutions that better meet business needs
- Mentor who has actively developed and coached team members across the organization resulting in improved employee retention and higher team productivity

### **What areas can Dane help an organization?**

- IT budget planning – capital and operating expense (know how much it costs to support each application or infrastructure solution to align spend with business goals)
- Upgrade planning with application health review and strategy for support (know risks and impact of upgrade now or delay until later approaches)
- Overall IT roadmap development (know what systems to prioritize when)
- IT organizational design and review (know how to support the organization and what impact your roadmap may have on staffing / development requirements)
- Contracts review and calendarization (know when they expire and how far in advance to start reviews, as well as risks of being locked in / exit strategies)
- Deliver large scale programs/projects (payroll, timekeeping, T&E tools, AP processes, ERP selections, multi-currency implementation, reporting, acquisition integration into finance systems, divestments) (within scope, budget, timeline, risk tolerances)
- Implement demand management processes (align business needs and expectations with available budgets and technologies, define PMO processes and approvals)

### **What you need to understand about Dane Reece and how he will contribute to your success.**

Communicating between a functional business area and a technical team is something I thrive doing. Being able to define a process design, find a system or process solution, and ultimately implement changes benefiting the organization are key tenants of my career and experience. I am not satisfied with “the status quo” or “the way it has always been done”. Finding sustainable ways to implement new tools, while passing a financial filter over the value being delivered are key to my success.

I have been successful learning new industries, solving problems facing the business, optimizing processes, and managing complex programs/projects.

Call me at 303.882.5254 or e-mail me at [linkedin.dane@gmail.com](mailto:linkedin.dane@gmail.com) to discuss how I can help solve issues facing your organization.
